SUMMARY

Frontend Developer with a 5-year Graphic Design background and IBM Full-Stack Software Development certification. I build visually polished, functional web applications using React, Node.js, and modern CSS. Seeking a remote frontend role where design sensibility and technical skill are both valued.

SKILLS

Technical: React · JavaScript (ES6+) · HTML5 · CSS3 · Node.js · Express.js · Python · Git · GitHub · REST APIs · Responsive Design

Design: Figma · Adobe Creative Suite · UI/UX Design · Graphic Design

Tools: Docker · VS Code · Vite

PROJECTS

Personal Portfolio | Live:

github.com/FerRuizDevp/professional-animated-portfolio

React · JavaScript · CSS · EmailJS · GitHub Pages

- Designed and built an animated, space-themed developer portfolio with dynamic project loading via the GitHub API, a functional contact form via EmailJS, and smooth UI animations. Deployed to GitHub Pages.

E-commerce Application | In Progress

React · TanStack Query · Node.js · TypeScript · PostgreSQL · Clerk · Tailwind CSS

- Full-stack e-commerce platform featuring user authentication, product listings, real-time chat, and integrated payments. Built with a focus on scalable architecture and polished UI.

EXPERIENCE

Freelance Graphic Designer

May 2020 – Present

Self-Employed, Remote

- Designed and delivered visual assets for digital platforms, ensuring consistency with brand identity and responsiveness across devices.
- Collaborated directly with clients to translate requirements into polished design solutions, managing feedback cycles and project timelines.
- Built and maintained design systems and visual guidelines used across web and print materials.
